

# Environmental Policy Statement of Waagner-Biro Bridge Systems

We are aware of our full responsibility for the environmental impacts of the company's activities. We are dedicated to fulfilling requirements and expectations regarding economics, social and environmental sustainability.

While committed to compliance with legal requirements and other obligations we encourage continual improvement, emphasizing the following areas:

## **Environmental Design:**

We constantly pursue sustainable design solutions for our clients while always following all contractual requirements and strictly staying inside commercial frameworks. We chose design options which match the scope of local suppliers.

## **Responsible Sourcing:**

Costs, quality, health and safety policies alongside environmental values are key criteria when awarding sub-contracts.

## **Means of communications:**

Waagner-Biro is aware of the adverse impact our business travel could have on the environment and the increase of carbon dioxide emissions. We encourage our employees to use more eco-friendly means of transportation as well as finding technological alternatives to travelling such as telephone and video conferences.

## **Construction Site:**

Emissions caused by the installation of bridges, stage equipment, facades, machinery and steelwork and other components are not limited to carbon dioxide and waste. We consider the intended method of installation whereby the efficient solution is obtained.

## **After Sales:**

We review operational and maintenance procedures and recommend eco-friendly processes and alternatives to our customers.

**Awareness:**

Although the key environmental issues are responsible sourcing and environmental design, it is important that all business units are considered. Also environmental aspects with less potential for improvement, such as waste separation in the office and copy paper consumption, are included in the improvement process.

We include our employees in our environmental programmes and activities encouraging them to partake and bring with them suggestions of improvement. The best activities receive the annually "Environment CIP Award".
